To SINTEC

Subject : Sintec Reference letter

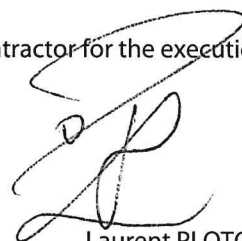

In 2016-2018, ALSTEF designed and installed the Baggage Handling System of the new Rostov on Don Airport 'PLATOV'. For this project, we decided to sub-contract the electrical tasks to a Russian company: **OOO Sintec**.

They have performed the following works under our supervision:

- Detailed studies of all electrical panels: 4 Main Control Panels, 14 Secondary panels (Control, Safety) and more than hundreds of HMIs and control boxes
- Detailed studies of field cabling (few kilometers): Power, control (ASi, Profibus)
- Manufacturing of the whole panels
- Site installation (One year of works)
- As built documentation

All these works were performed in accordance with the contract. The quality of the performed works is fully compliant with our standard expectations.

I can recommend the company Sintec to any customer as a reliable Contractor for the execution of similar electrical works.
